

About Us

About Us

LEARN MORE ABOUT US

By working closely with some of the best known manufacturers together with our own quality engineered products; Valves, Instruments & Pumps, we are able to provide you with complete project solutions. Some 200 companies in 26 countries on 4 continents with more than 4000 employees are dedicated to making your projects run more smoothly

VISION

The way we manage our company is defining our place in the market. By applying knowledge and technology, we can create a successful platform for ourselves as well as for our customers and suppliers.

Our Mission

IFTG is a leading technology and service company, dedicated to servicing our customer throughout the world with our products.

BELIEFS

At IFTG, we believe that our innovative products and knowledge provide our customers with unique solutions to their applications, thus helping them maintaining a high degree of competitiveness on their markets. Our shared values guide us, inspire us and drive us to succeed every day. As individuals we live them. As a company, we measure our success by them.

.

Build Customer Value

We listen to customers, understand their challenges and strategies, and ensure that IFTG is viewed as fundamental to their success. o.

Instill Excellence

We are unrelenting and uncompromising in our pursuit of quality and reliability in our products, systems and services.

Invest in Our Communities

We invest in products, programs and organizations that focus on sustainable resources and community development—to the benefit our customers, employees and the environment.

Embrace Diversity and Teamwork

We embrace employees from different geographies, cultures, backgrounds and with different points of view. We contribute as diverse individuals and win as a unified team by sharing

Increase Shareholder Value

We strive to create and execute upon a strategy which results

in above-average shareholder returns over the long term by understanding the industry we serve and by having frequent and transparent communication with all of our stakeholders.

Enable Sustainability

We encourage and enable sustainability by designing solutions that helps our customers to responsibly manage their processes to conserve the world's natural resources
