The VPI-concept

VPI stands for Valves, Pumps and Instruments and the concept’s main objective is to reduce the total costs for indirect materials. The concept is used by AkzoNobel sites within Scandinavia and projects worldwide.

Case Studies

AkzoNobel

In AkzoNobel’s ambition to make their purchase and logistic processes more efficient, they have chosen IFTG as their partner within the product groups; valves, pumps and instruments. The mission for IFTG is to supply and manage process components, by means of our own group companies and other contracted external suppliers to the Scandinavian sites as well as to projects worldwide.
