

Project Solutions

SINGLE SOURCE SUPPLIER WITH NECESSARY KNOW-HOW

Project Solutions

Project Solutions

We have for more than 15 years been assisting our customers & partners with complete project solutions.

Our vast range of components and specialized technical know-how gives IFTG a unique advantage in being our customers single partner in their projects.

Each product segment & brand has its own trained & specialized engineers working closely with the customer in order to always find the best possible solution for their process.

Having sister companies & offices all over the world gives us the network we need to contribute to our customers' needs in engineering-, commissioning-, on-site assistance-, logistics-, aftersales & basically all steps for making our cooperation long-term efficient & professional.

By having IFTG as their single partner our customers have been able to focus their efforts in their daily production efficiency & on-time start for their facilities. No matter if it is a complete new site, extension of existing or only a small renovation we have been able to show extra value for each project & customer. Some of the fields we have been able

to take apart of are: Oil & gas, Petrochemical, Steel & mining, Chemical, Pulp & paper and more.

Please see also our reference lists for more references & don't hesitate to contact us for your next project.
