SEADRILL WEST ALPHA – NORWAY
ASC SHIPBUILDING – AUSTRALIA

Kindly contact us for a complete international reference list.

Valmet (former Metso Fiber)

Since 1992 we cooperate with Valmet (former Metso Fiber) in Karlstad, as the purchasing partner in regulating and on-off valves. IFTG supply Kvaerner Pulping with everything from small projects to complete packages of valves for fibre lines. Our task in this cooperation is to optimize the choices of valves concerning quality, price, delivery time, purchase and production of documents.

AkzoNobel

In AkzoNobel's ambition to make their purchase and logistic processes more efficient, they have chosen IFTG as their partner within the product groups; valves, pumps and instruments. The mission for IFTG is to supply and manage

process components, by means of our own group companies and other contracted external suppliers to the Scandinavian sites as well as to projects worldwide.
